

# Database Modernization Discovery Session

Accelerate your path to becoming a data driven organization.

Business leaders are constantly challenging their IT organizations to accelerate innovation while reducing costs and increasing performance. Migrating to the cloud offers many benefits, including cost efficiency and seamless scaling with a much lower risk of downtime or disruption.

But internal IT teams often lack qualified engineers who can architect and design a proper cloud database environment that meets these objectives. And often, data modernization projects stall because of hidden costs, data security and compliance challenges, unforeseen incidents or additional requirements that weren't included in the original scope.

**We can help you steer clear of these obstacles with a complimentary Database Modernization Discovery Session.**

## What to expect?

The data experts at Onica by Rackspace Technology will help you build a strategy to migrate and modernize legacy on-premises databases in the cloud. During your complimentary two-hour discovery session, we'll review some modern cloud architectures for data and explore the tools available on Amazon Web Services (AWS). We'll also discuss where you are today in your data modernization journey, and where you want to go. After the conversation, we will craft a proposal with recommended next steps for your team.

## During your discovery session, we will:

- Explore database modernization trends
  1. Moving to managed services
  2. Database transformation
  3. Polyglot persistence
- Provide an overview of AWS database solutions
- Identify your database modernization challenges

## How It Works

- 1. Introduction:** An Onica® database architect will join you on a quick call to gain an understanding of how you are managing data in your organization now. In this meeting, we will ask where your data is stored and which technologies you are using.
- 2. Database Modernization Discovery Session:** A data solutions architect and database specialist will conduct a two-hour session with your IT engineering team to better understand the challenges of your current data environment and to identify how you can modernize data across your organization in the cloud.
- 3. Recommendations:** Following your discovery session, our data specialist will suggest next steps for your team.

## Reserve Your Complimentary Database Modernization Discovery Session Today.

## About Onica by Rackspace Technology™

- 2,500+ AWS accreditations
- AWS Service Delivery Partner for Database Migration Services, RDS, DynamoDB and Redshift
- 13 AWS Service Delivery Designations
- AWS 2021 Migration Partner of the Year (U.S. and Canada)

## Expertise Across 15 AWS Competencies

- Data & Analytics
- DevOps
- Education
- Financial Services
- Healthcare
- Industrial Software
- IoT
- Machine Learning
- Microsoft Workloads
- Migration
- Oracle
- Retail
- SaaS
- Storage
- Travel & Hospitality
