

Rackspace Technology Financial Services Solutions for Insurance

Multicloud solutions built for organizations that provide insurance and reinsurance services in consumer and business markets.

To respond to changing customer expectations and market competition, insurance companies need to adopt digital, always-on IT delivery models. To do so, they need a trusted partner to guide them through the intricacies of cloud migration, help them deploy to the right cloud at the right time and provide the white glove support needed for a smooth transition.

To solve these challenges, many insurance organizations are managing their cloud solutions with Rackspace Technology. They are gaining a partner who understands how to create and maintain customer- and market-focused cloud environments.

Experts Dedicated to Your Success

Secure multicloud and hybrid solutions from Rackspace Technology help insurers retain customer loyalty, meet changing customer expectations, adopt emerging technologies and respond to ever-tightening compliance and security mandates. Rackspace Technology solutions provide compliant IT-as-a-Service (IaaS), on the latest technologies and across applications, data, security and infrastructure, all tailored to the needs of the insurance industry.

Key Features

Rackspace Technology offers a range of fully managed, third-party public cloud solutions designed for insurance companies, which include the following key features:

Security, Governance, Risk Management and Compliance: PCI, ISO, SOC and FISMA compliant solutions, as well as disaster recovery and business continuity solutions, address different financial regulations in multiple regions.

Big Data: Our big data experts can guide you through the entire big data transformation lifecycle — from planning, design, development, support and operation of the platform and IaaS.

Management and Optimization: Workload assessments to help prioritize and plan cloud migration, including architectural and cloud readiness assessments and software-defined hybrid clouds.

Advisory Services and Migration: Full assessments of your IT architectural landscape, including deployment planning, risk assessments, migration planning, execution and legacy decommissioning.

Colocation and On-Premises Management: Secure your hardware in Rackspace Technology world-class data centers or leverage its expertise in on-premise environments.
