

Rackspace Government Cloud on AWS

Securely innovate mission-critical government solutions faster while saving up to 70%.

Fully Managed Government Cloud, Built for Security and Compliance

Government IT organizations are increasingly expected to deliver more, faster and at lower cost, but security and compliance requirements often make this difficult, if not impossible. Rackspace Government Cloud (RGC) on Amazon Web Services (AWS) enables you to drive organizational agility, continuous innovation and best-value IT services through Cloud Smart adoption, while RGC on AWS addresses up to 80% of your security and compliance requirements.

Rackspace Technology accelerates the adoption of transformative technologies and powers the future of high-value technical capability required to support your mission. Government agencies and government cloud solution providers choose RGC on AWS to help solve challenges in security, compliance and operations, so they can deliver innovation to government. RGC on AWS enables you to:

- Reduce your dependency on costly contract expertise to address stringent security and compliance requirements.
- Eliminate the operational burden of continuously managing over 325 security controls and maintaining thousands of pages of documentation.
- Avoid prohibitively high costs and time investment required to achieve Authorization to Operate (ATO).

Multicloud Expertise, Automation and Security-as-a-Service

Leverage the same cloud technologies that power the Fortune 100, in a secure platform, with the additional security and governance controls that support the mission of government. With RGC on AWS, you benefit from a turnkey solution that offers accelerated deployment and automates compliance in a secure, FedRAMP-authorized platform-as-a-service.

RGC on AWS delivers fully managed security and compliance in a fraction of the time it usually takes — with operational cost savings of up to 70% compared to building from scratch. With RGC on AWS, your cloud solution will be ready for assessment and authorization in record time.

On-Demand Access to Expertise Only When You Need It – Teams for AWS

Planning your cloud strategy? Need to optimize cost without sacrificing functionality or adoption speed? An assigned team of experts works with your team to help you optimize your workload migrations, take advantage of cloud native capabilities and retool your team.

The same team of cloud experts is assigned to work with your team at any point on your cloud journey. No hourly labor rates contracts.

The Rackspace Technology™ Edge

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure. We put technology to work and deliver your future faster.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- Positioned as a leader in The Forrester Wave™: Multicloud Managed Services in North America, Q2 2020
- Powering 15+ FedRAMP ATOs and numerous government cloud solutions.
- Founder, alongside NASA, of OpenStack and operator of the largest OpenStack cloud
- 2,500+ cloud professionals
- Hosting provider for more than half of the Fortune 100
- Servicing over half of U.S. federal government agencies
- 20+ years of managed services experience

Security and Compliance

- JAB Authorized FedRAMP ATO
- FISMA authorized
- NIST 800-53
- NIST 800-171 DFARS ready
- CJIS, ITAR and FIPS 140 compliant
- 24x7x365 SOC, staffed by U.S. team
- Always-available, secure business continuity backup-and-restore capabilities

AWS Expertise

- 2,700+ AWS certifications
- One of the leading AWS consulting partners with 14 competencies
- AWS Premier Consulting Partner
- AWS Public Sector Partner

Rackspace Government Cloud on AWS

Securely innovate mission-critical government solutions faster while saving up to 70%.

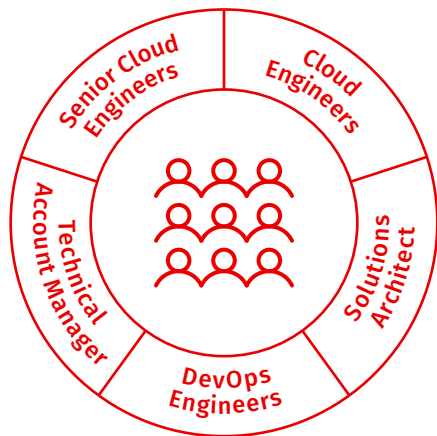

Advantages of Partnering with Rackspace Technology

Rackspace Technology meets you where you are on your cloud innovation journey. From design, build, migration, ongoing management and optimization, to retooling of your team, RGC on AWS creates the foundation for innovative solutions in the public sector.

- **Accelerate time to market:** Achieve time-to-mission up to three-times faster than in a DIY approach, by eliminating complex processes around system design, testing, implementation, configuration, provisioning, assessment and authorization.
- **Lower TCO:** Reduce overall TCO of your cloud deployments by up to 70%.
- **Future proof infrastructure:** Run any app, both traditional and cloud native.
- **Simplify compliance:** Continuous monitoring helps ensure constant security and compliance.
- **Migrate your workloads incrementally to meet your needs:** Purchase migration, cloud management and advisory services as you need so you can migrate one or many workloads at a time. Each of your migrated workloads can be at a different stage in your cloud journey.
- **Decrease expenditures:** Integrated tooling and processes reduce initial investment, as well as advisory, engineering, assessment and authorization costs.
- **Depend on certified expertise:** Industry-recognized, always-on customer service combined with scalable, managed tools and services.

The Rackspace Technology + AWS Differentiator

Migrate workloads faster with RGC on AWS. Get there with even more confidence and speed with Teams for AWS for Government.

Rackspace Teams Pod
