Migration Readiness Workshop

Uncover potential cost savings by moving to Amazon Web Services (AWS) Cloud

Comparing on-premises costs to public cloud costs can be a complex and time consuming activity. To help accelerate your cloud initatives, Rackspace Technology has developed a one-day virtual workshop that delivers a proven framework to help you uncover the key insights needed to help you speed up the decision-making process and accelerate your cloud journey.

Key Outcomes and Deliverables

To assess the true potential cost, utilization information has to be mapped to a right-sized environment so organizations can optimize IT infrastructure costs and increase business agility. Rackspace Technology will work with you to identify substantial saving opportunities while taking full advantage of the benefits of the public cloud, including:

- Total Cost of Ownership (TCO) ROI Report
- Financial analysis of moving workloads to AWS
- Understanding and decision on areas of existing strength and focus
- Proposal and roadmap for moving your workloads to AWS

Deep-dive analysis into the following areas:

- Security
- Operations
- Business
- Platform
- People
- Process

Pre-Migration Cost Assessment

As part of the Migration Readiness Workshop, Rackspace Technology will deliver a pre-migration cost assessment by leveraging tools such as CloudChomp to help customers understand potential cost savings when moving on-premises IT infrastructure to the cloud.

- Uncover the costs associated with running workloads on AWS
- Learn how to provision based on current utilization
- Gain insights on their on-premises TCO
- Discover options for dealing with existing software licenses (including Microsoft)

AWS Migration Expertise

Rackspace Technology is uniquely qualified to work across all stages of your cloud adoption and evolution. This includes building the initial foundation (landing zone) and migration strategies for workloads, containerization of applications and services and application modernization (adoption of serverless). The experts at Rackspace Technology consult with clients in a team format — bringing in specific subject matter experts as needed and identified throughout various stages of the project.
