

Rackspace Application Services for SAP

Modernize your apps for strong performance in the cloud.

As you seek help with managing your legacy applications or transforming to new, cloud-based SAP applications and technology, Rackspace Application Services for SAP can guide you on your journey, helping you become a digital business faster and with less risk.

Experts Dedicated to Your Success

As the leading multicloud specialist with extensive SAP expertise, Rackspace accelerates the value you get out of your SAP applications, whether they run in the cloud on Amazon Web Services (AWS), Microsoft® Azure®, Google Cloud Platform™, Rackspace Private Cloud or in your own dedicated environment. Rackspace experts analyze your business operations, then design and implement SAP applications and data that support the ways you want to work. Next, they deploy, manage and optimize those applications and data with the infrastructure that maximizes their effectiveness.

Key Benefits

With a global presence spanning 150 countries, Rackspace gives you access to a large pool of technology talent. Rackspace Application Services for SAP delivers functional and technical capabilities across a global platform to continuously deliver on customer-specific business objectives.

Cost and efficiency: By modernizing your SAP solutions on optimized infrastructure, Rackspace can help lower maintenance costs associated with legacy systems while generating higher levels of efficiency.

- Customers in 150+ countries
- 20+ years of SAP experience
- SAP-certified HANA operations services
- SAP-certified hosting services
- SAP Silver Partner

"I had never worked with Rackspace and time was short. We had 70 days to migrate our SAP environment. Other providers told us 'no' but Rackspace helped us rethink our approach. Their application expertise was refreshing."

Jason Friedlander :: CTO, Coinstar

Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Managed Application Services: Rackspace managed services are designed to help your organization optimize and generate more value from your SAP application portfolio. Rackspace systems and application integration services, including SAP PI/PO, EDI, MuleSoft® integration and multi-cloud and hybrid-cloud connectivity are designed to deliver value throughout every phase of the application portfolio life cycle. These services can also help you realize an increased level of interoperability and better return on investment through ongoing maintenance and operations.

Managed Application Services include:

- Advanced configuration and optimization
- SAP Basis and functional support
- Administration, monitoring and maintenance
- Data services

Managed Infrastructure Services: Rackspace provides customers with 24x7x365 support for their supported environments, including SAP applications and landscapes. Managed infrastructure services are backed by mature, prioritized ticket management with strict adherence to predefined SLAs for customer contact, callback, event escalations, responses and resolutions.
