# SAP Modernization on Google Cloud Platform

## Future-proof your ERP & gain actionable insights with Google Cloud Platform

Migrating from an on-premises SAP environment to SAP S/4HANA on Google Cloud Platform (GCP) can appear intimidating, particularly for organizations that have little experience with cloud infrastructure. There's good reason for caution: shifting mission-critical workloads without proper planning can disrupt your business.

Fortunately, GCP's smart infrastructure and migration accelerators, coupled with proven SAP and GCP expertise from Rackspace Technology, can help you complete an accelerated migration on GCP with less risk.

GCP solutions on smart infrastructure also accelerate your pace of innovation and enable easier integration of your SAP applications and data.

SAP customers trust GCP. With its five layers of data protection, AI-driven threat detection and world-class cyber security, GCP is purpose-built to protect systems, data and users and delivers proven performance at scale.

Advanced AI/ML capabilities such as AutoML and BigQuery enable business users without data scientists to create unmatched competitive advantage. Data silos become non-existent, making it possible to consolidate your SAP data and enrich it with Google data in BigQuery for full insight across the business.

These capabilities give you the benefits of SAP S/4HANA's transactional and analytical capabilities, plus access to a rich ecosystem of cloud-based applications and development tools on GCP.

### Experts Dedicated to Your Success

As the leading multicloud specialist with extensive SAP and GCP expertise, Rackspace Technology accelerates the value you get out of your SAP ERP applications and serves as a trusted partner that offers management services built on industry-leading best practices.

With a global presence, Rackspace Technology provides customers with access to a large pool of technology talent and delivers functional and technical capabilities to continuously deliver on customer-specific business objectives.

### About Rackspace Technology™

Rackspace Technology is your trusted partner across cloud, applications, security, data and infrastructure.

- A leader in the 2020 Gartner Magic Quadrant for Public Cloud Infrastructure Professional and Managed Services, Worldwide
- 2,500+ cloud professionals
- Hosting provider for more than half of the Fortune 100
- 370+ technical Google Cloud Platform certifications
- Google Cloud Partner
- Customers in 150+ countries
- 20+ years of SAP experience
- SAP-certified HANA operations services
- SAP-certified hosting services
- SAP-certified Partner Center of Expertise
- SAP Silver Partner

### Fanatical Experience™

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

## Benefits

**Better economics:** Pay for only the compute, storage and other resources you use, with savings of up to 40% compared to running SAP systems on-premises.

**Focus on your business:** Rackspace Technology will manage your SAP applications so you can focus on creating innovative and differentiated customer experiences.

**Reliability:** Gain increased global service availability by putting your SAP systems on GCP — with automations that help you quickly recover from infrastructure or service interruptions, as well as dynamic scaling to meet demand.

**Data-driven decisions:** Work with the Rackspace Technology data services team to leverage ERP data and additional data sources for end-to-end solutions around forecasting in resource planning and supply chain management

**Enhanced manufacturing operations:** Improve manufacturing processes with solutions leveraging IoT and ERP data for preventative maintenance and remote operation applications.

## Key Features

**Professional Consulting Services:** Rackspace Technology assists customers in selecting the optimum managed solution and service models to meet their business and integration needs.

Professional Consulting Services include:

- Assessments
- System implementation and integration
- Migration services
- Data services
- Application development

**Managed Application Services:** Rackspace Technology managed services are designed to help your organization use smart, efficient ways to optimize and generate more value from your SAP ERP application portfolio. Rackspace Technology systems and application integration services, including SAP PI/PO, EDI and MuleSoft® integration and multicloud connectivity are designed to deliver value throughout every phase of the application portfolio lifecycle and help you realize an increased level of interoperability and better return on investment through ongoing maintenance and operations.

Managed Application Services include:

- Advanced configuration and optimization
- SAP Basis services
- Administration, monitoring and maintenance
- Data services

### Take the Next Step

Let's talk about how Rackspace Application Services for SAP on GCP helps you achieve your goals.
